DETAILED ACTION

- 1. Applicant's election without traverse of Group I, claims 1-2, in the reply filed on March 10, 2005, is acknowledged.
- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Theurer (US 5,961,271).

Theurer discloses a system for unloading elongated rails, that inherently requires all the method steps of operation as recited in the instant claims. The unloading system of Theurer includes rail feeding devices 34 and two powered thread boxes 4 for guiding and transporting first, second, third and fourth rails onto a railroad bed.

Regarding the instant claimed step of propelling the railcar along the track at a sufficient speed, as recited in instant claims 1 and 2, it is noted that the unloading system of Theurer inherently requires the railcar to move along the track at a sufficient speed, i.e. a speed corresponding the operating speed of the two powered thread boxes, for proper operations of laying the rails onto the track in a substantially end to end relationship.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should further consider the structure of Moorefield.

Application/Control Number: 10/773,577

Art Unit: 3617

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Le whose telephone number is 703-308-3663. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
